

Shift up a gear in sales!

DualTronic™ Dual Clutch Modules
from BorgWarner

Brand new for
the aftermarket!

Dual clutch systems from the innovation leader.

Coming in Q4 2022!

Cover some of the most driven vehicle brands in Europe with six products.

BorgWarner is the worldwide leader in automatic transmission clutch components and systems. Our DualTronic™ dual clutch modules lead the global market in transmission applications and production volume.

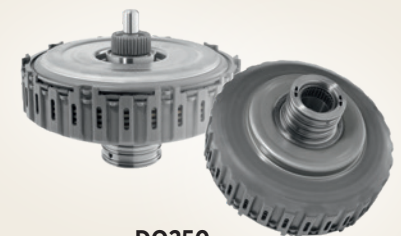

Many millions of vehicles from leading brands are now on the road throughout Europe with our pioneering clutch systems. That is why we are now expanding our aftermarket product portfolio with the launch of dual clutch systems for passenger cars: From Q4 2022, we will offer six DualTronic™ modules for some of the most common and widely used vehicle types. These are the same products that BorgWarner also supplies to engine manufacturers as an original equipment manufacturer.

Selling points:

- Original spare parts without difference to the OES products
- Same supplier base as for series products with seamless quality control
- The latest OEM requirements are implemented immediately
- Guaranteed accuracy of fit
- Worldwide service
