Friction Technology

Features & Advantages

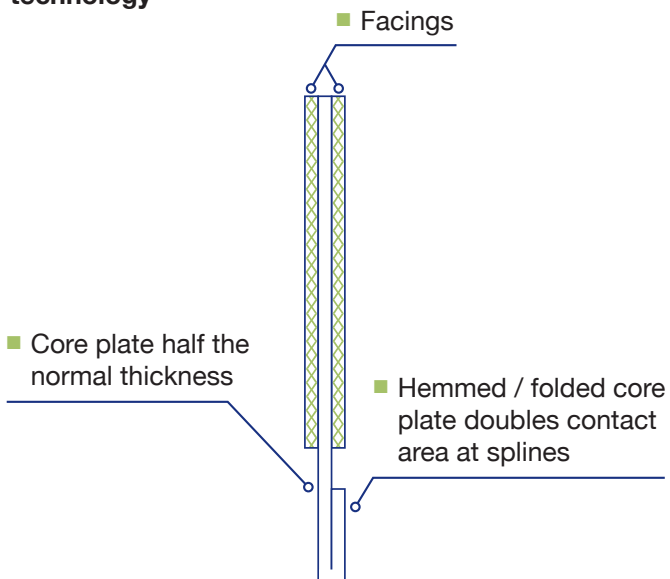

We are a global leading manufacturer of friction elements, used in ATs, CVTs, DCTs, torque converter lock-up clutches and All-Wheel Drive devices.

Features & Benefits

- Friction Plates for lower lube flow, reduced drag torque and shudder resistance.
- Two-step lining concept for active plate separation enables drag torque improvements.
- Hemmed spline technology for more torque in less space.
- Segmented core plates for better material usage and cost reduction

Hemmed spline technology
