

Brady D. Ericson

Vice President & President
& General Manager of
BorgWarner Fuel Systems
and Aftermarket

Brady D. Ericson was appointed Vice President and President and General Manager of BorgWarner Fuel Systems and Aftermarket in March 2022. In this role, Ericson is responsible for BorgWarner's global Fuel Systems and Aftermarket business.

Prior to his current role, Ericson held a number of positions of increasing responsibility since joining BorgWarner in 2000. These include: President and General Manager, Morse Systems, Chief Strategy Officer, President and General Manager, Emissions Systems, Vice President and General Manager, Emissions Systems; Vice President, Global Manufacturing Strategies for Turbo and Emissions Systems; Vice President, Operations China and Korea, Turbo and Emissions Systems; and several other roles in operations, engineering and sales.

Prior to joining BorgWarner, Ericson held various sales and engineering positions with Honeywell (formerly AlliedSignal) and Ford Motor Company.

Ericson holds a Bachelor of Science in mechanical engineering from Kettering University and a Master of Business Administration from Duke University. He serves on the advisory council to the Dean of Engineering at Kettering University where he spearheads the Scholar's Program. Ericson also leads BorgWarner's fundraising efforts for the American Cancer Society.
