

Arnaldo Iezzi Jr

Vice President &
General Manager Europe,
PowerDrive Systems

Arnaldo Iezzi Jr was appointed Vice President and General Manager Europe, PowerDrive Systems, in January 2022. In this role, he has both operations and business responsibility. Iezzi is an experienced leader with a particular focus on revenue growth and manufacturing excellence.

Iezzi joined the company in April 1999 and has held senior management positions in several business units including Turbo, Thermal Systems and Morse at BorgWarner plants across Europe and South America. Most recently, he led the launch of green field factories in Brazil and Poland and the introduction of new products such as eBoosters, Battery Packs and Stationary Chargers, as well as High Voltage Traction Inverters. At PowerDrive Systems, he now oversees the inverter, eMotor, power electronics, integrated drive module, onboard charger and battery management system product lines in Europe.

Prior to joining BorgWarner, Iezzi worked as a Production Supervisor for Mahle in Sao Paulo and was a Quality Engineer at Renault do Brasil.

Iezzi holds a Bachelor's degree in metallurgical engineering from Centro Universitário FEI in Brazil and a Master of Business Administration from Ohio State University.
