BorgWarner Expands Availability of Thermal Management Products to the Independent Aftermarket Distribution Network

BorgWarner is pleased to announce that its commercial vehicle thermal management technologies will be available through the independent aftermarket distribution network by those currently distributing Delco Remy® Genuine Products in the United States and Canada. BorgWarner's thermal management products include:

- **Electronically actuated Viscronic® variable speed fan drives** designed to respond directly to engine cooling needs for more available horsepower, improved fuel efficiency and lower emissions
- **K series on/off fan drives** featuring an innovative design for improved belt life and fewer parts for easier maintenance
- **Viscous fan drives** with improved temperature control and smooth, soft fan engagement

Currently serving hundreds of independent distributors throughout North America with Delco Remy branded starters and alternators, distributors are provided with online ordering, technical literature and tech videos as well as inventory management and on-site training, customer service and technical support. For more information about BorgWarner's extensive aftermarket product portfolio, please contact the regional sales and service manager in your area.
