

## **More Power for the IAM – BorgWarner Expands Turbocharger Product Line**

- *17 new replacement turbochargers for renowned automakers*
- *Meet BorgWarner's requirements for performance and reliability*
- *Provide powerful and reliable operation even under severe conditions*

Auburn Hills, Michigan, April 17, 2018 – BorgWarner continues to expand its broad portfolio of advanced service replacement turbochargers, reaffirming its position as a strong partner in the independent aftermarket (IAM). With 17 new turbochargers for diesel vehicles from numerous globally renowned automakers, BorgWarner further enhances its already comprehensive portfolio and supports the growing demand for high-quality replacement turbochargers. In addition, the company simplifies purchase processes for aftermarket customers since they can order all BorgWarner parts needed from one reliable place. Engineered to improve performance and fuel efficiency while reducing emissions, all BorgWarner aftermarket boosting technologies offer the same benefits and quality as new BorgWarner series products.

“We see strong growth potential for turbochargers as they play a vital role in complying with evolving emissions regulations. As a result, the need for high-quality replacements will increase as well,” said Michael Boe, Vice President and General Manager, Global Aftermarket, BorgWarner Turbo Systems. “With the most recent expansion of our turbocharger aftermarket portfolio, BorgWarner is meeting current trends and strengthening its reputation as a reliable partner in the aftermarket.”

The 17 new replacement turbochargers feature either tried-and-tested wastegate technology or leading-edge variable turbine geometry designs. All of them boost performance and efficiency for a wide range of diesel models from numerous global automakers. From compact cars to light-duty commercial vehicles, BorgWarner's robust and efficient turbocharging solutions can be equipped to engines ranging from 65 kW to 142 kW in power and 1.3 to 3.0 liters in displacement. With over 60 years of experience as a pioneer of turbocharging solutions, BorgWarner engineers and qualifies its service replacement turbochargers according to the company's challenging requirements for performance, safety and reliability. In addition, the

advanced boosting solutions are assembled, balanced and calibrated in compliance with BorgWarner's high global quality standards. The compact turbochargers feature perfectly matching connections for quick and easy installation. Manufactured according to strict guidelines based upon internal development and quality assurance processes, the aftermarket solutions provide powerful and reliable operation even under extreme conditions.

Providing excellent performance, combined with reduced emissions and fuel consumption, all of BorgWarner's aftermarket turbochargers are excellent replacements for numerous vehicle models from compact cars to light-duty commercial vehicles. Through BorgWarner's service and distribution network, they can be delivered almost anywhere in the world within 24 hours.
