## **BORGWARNER OPENS NEW CAMPUS IN BRAZIL**

*BorgWarner Targets Increasing Customer Demand for Fuel-Efficient Technologies with New Production Facility and Engineering Center in Itatiba City*

*Auburn Hills, Michigan, April 16, 2013* – BorgWarner officially opened its new production facility and engineering center in Itatiba City, Brazil, on April 9, 2013. The new campus will produce several environmentally friendly technologies for passenger cars and commercial vehicles such as turbochargers, viscous fans and fan drives, engine timing systems and emissions technologies. At 204,500 square feet (19,000 square meters), BorgWarner's new facilities are located 80 km northwest of São Paulo and are twice as big as its former facility in Campinas.

“With our new production facility and engineering center in Itatiba City, we are laying the foundation for expanding our excellent position as a leading supplier of advanced powertrain technologies in the rapidly growing South American market,” said James Verrier, President and Chief Executive Officer, BorgWarner. “New legislation is driving automakers to improve fuel economy and reduce emissions. Consumers are demanding performance and enhanced drivability. BorgWarner's advanced technologies satisfy all of these needs with local production and engineering capabilities.”

Driven by growing demand for BorgWarner's fuel-efficient technologies, the new campus was built in only 18 months. Relocation of production capacity from Campinas to Itatiba City took place without any interruption in operations. Itatiba City generates great interest with multinational companies because of its strategic location close to major development regions and the capital of the federal state, São Paulo. With a total area of nearly 100,000 square meters, the environmentally friendly campus offers additional space for future expansion and is expected to receive LEED (Leadership in Energy and Environmental Design) certification soon. In addition, the new campus includes an engineering center with four engine test stands for developing and introducing new technologies to provide local customers with the latest powertrain technologies.

## About BorgWarner

Auburn Hills, Michigan-based BorgWarner Inc. (NYSE: BWA) is a technology leader in highly engineered components and systems for powertrain applications worldwide. Operating manufacturing and technical facilities in 57 locations in 19 countries, the company develops products to improve fuel economy, reduce emissions and enhance performance. Customers include VW/Audi, Ford, Toyota, Renault/Nissan, General Motors, Hyundai/Kia, Daimler, Chrysler, Fiat, BMW, Honda, John Deere, PSA, and MAN. For more information, please visit [borgwarner.com](http://borgwarner.com).

The opening ceremony at BorgWarner's new facility in Itatiba City, Brazil, was attended by James Verrier, President and Chief Executive Officer, BorgWarner; João Gualberto Fattori, Itatiba Mayor; and Pete Kohler, President and General Manager, BorgWarner Turbo Systems Commercial Diesel Products, as well as other BorgWarner executives.
